

Whole-Home Indoor Air Quality

Dehumidification • UV Purification • Hydrogen Peroxide Air Treatment • High-Efficiency Filtration

The air in your home recirculates through your AC system **75 to 150 times every day**, carrying dust, humidity, mold spores, and germs along with it. In Florida's climate, that is a recipe for musty odors, allergy flare-ups, and moisture damage. Trade Pro Services installs proven, professionally fitted equipment that treats the whole house through the system you already own.

Whole-House Dehumidifiers

COMFORT • MOISTURE CONTROL

Florida humidity doesn't stay outside. Excess indoor moisture breeds mold and mildew, warps wood, and makes your home feel sticky even with the AC running.

- Automatically holds the humidity level you choose. Set it and forget it.
- Stops musty odors, mold, and mildew before they start
- Protects walls, floors, furniture, and electronics from moisture damage
- Sized for any home: crawl spaces, basements, or full HVAC integration

UV Light Air Purification

PURE • GERM & MOLD REDUCTION

A powerful UV lamp mounted inside your ductwork bathes the AC coil (the number one breeding ground for mold in your system) in germ-killing light, every hour of every day.

- Lab proven to reduce airborne bacteria, viruses, and mold*
- Keeps your AC coil clean for better airflow, lower energy bills, and longer equipment life
- Eliminates that musty "dirty sock" smell at the source
- Ozone-free, low maintenance, with up to a 10-year manufacturer warranty

Hydrogen Peroxide Air Treatment

PURE • FOR MINI-SPLITS & DUCTLESS

Have a mini-split or ductless system? This compact unit turns the oxygen and humidity already in your air into a trace, safe level of hydrogen peroxide that actively neutralizes germs out in the room, not just inside the unit.

- Independently tested against viruses, bacteria, and mold*
- Treats the living space itself, ideal where ductwork can't reach
- Verified zero-ozone, quiet, and virtually maintenance-free

High-Efficiency Filtration

CLEAN • WHOLE-HOUSE MEDIA AIR CLEANERS

A whole-house media air cleaner replaces your flimsy 1" filter with a deep-pleated cabinet filter that captures far more (dust, pollen, pet dander, and smoke) without choking your airflow.

- Hospital-style MERV-rated media, matched to your family's needs
- Months of filtering capacity: change it a few times a year, not monthly
- Protects your AC equipment and keeps dust off your furniture

CLEAN + PURE + DRY

These systems work best together: filtration traps the particles, UV and hydrogen peroxide reduce the germs, and dehumidification removes the moisture mold needs to grow. Ask us about a whole-home package sized for your system.
